GET READY FOR SPRING!!!

Rain Gardens–Beauty with Benefits

Did you know that beautiful rain gardens also have many benefits?

Rain gardens help out our environment by... Filtering runoff to reduce pollution, Recharge local groundwater, Conserve water, Improve water quality, Protect rivers and streams, Remove standing water in your yard, Reduce mosquito breeding, Increase beneficial insects that eliminate pest insects, Reduce potential of home flooding, Create habitat for birds & butterflies, Survive drought seasons, Reduce garden maintenance, Enhance curb appeal and Increase garden enjoyment.

We've produced several eco-friendly rain gardens but the most notable ones are SCH Academy's Science and Technology Building located in Chestnut Hill, PA. This project is LEED Certified (Leadership in Energy & Environmental Design).

Another project we are also proud of is located in Wayne, PA at Valley Forge Military Academy where we combined the use of colorful flowering perennials, Flowering Ornamental Trees and Shrubs. We also incorporated Large Accent Boulders, Multi-color River Rocks, Steel Edging and Natural Mulch.

"From Sustainable Habitats to Elegant Gardens - We Are Your Outdoor Problem Solvers"

Want a Green Lush Lawn?

- The best place to start is to know your soil – Do a soil test.
- Spring would be a great time to have your lawn Aerated & Overseeded.

We provide a full range of lawn care services - Call us right now to get into our spring schedule.

**Organic Land Care also available

Drainage or Water Issue?

- We have been successfully helping homeowners with their drainage problems and storm water management for over a decade. From Surface Drains to Sub Drains, Pool Drains to Bio-Swales - Using only the latest materials and the proper Installation – We can help you redirect water where it belongs.

Contact us for the right solution at a fair price!
